**Dear [DataCode],**

## Introduction

I hope this message finds you well. My name is Azhi Mahmood, a dedicated second-year Software Engineering student at Koya University. I am reaching out to express my strong interest in an internship opportunity at DataCode, where I aim to apply my academic knowledge in a practical setting and contribute to your innovative projects.

## Skills and Experiences

Throughout my academic journey, I have been proactive in acquiring a comprehensive skill set that includes proficiency in Python, Java, HTML, CSS, JavaScript, and React. These skills were enhanced through structured learning from industry leaders such as Mosh Hamedani and Maximilian Schwarzmüller. My engagement in the web development club at university has not only allowed me to apply these technical skills but also to develop key competencies in teamwork, problem-solving, and project management. I am eager to leverage this blend of technical knowledge and soft skills at DataCode, contributing to your team's success while gaining invaluable industry experience.

## Languages

I bring to the table not just technical skills but also linguistic versatility, being fluent in Kurdish (native), Arabic (very good), and English (good). This multilingual ability enhances my capacity to communicate effectively in diverse team settings, ensuring smooth collaboration and mutual understanding.

I am particularly drawn to DataCode for its reputation as a leader in technological innovation and its commitment to fostering a learning environment for interns. I am confident that my background in software engineering, combined with my ability to work well within diverse teams, makes me a well-suited candidate for an internship at your company.

I look forward to the opportunity to further discuss how I can contribute to the exciting projects at DataCode. Thank you for considering my application. I am hopeful for the chance to engage with your team and contribute to your mission while advancing my skills in a real-world context.

**Sincerely,**

Azhi Mahmood muhammadali  
Koya University, Iraq.
